

# NETWORK ROLLOUT & SITE MANAGEMENT SOLUTION.

AND MUCH MORE.

itd

# THE ALL-IN-ONE SOLUTION FOR NETWORK MANAGEMENT

## EFFICIENCY

---

Thanks to our easy-to-use and highly configurable solution, reduce the time you spend on daily tasks, automate processes, create documents easily.

## CONTROLE

---

Align planning, project and process management with your strategy and objectives thanks to our powerful report and measurement data tool.

## STATE OF THE ART TECHNOLOGY

---

ClickOnSite is using the best technologies currently available (HTML5, Angular-JS, PostgreSQL/JSON or RESTful APIs).

# CLICKONSITE'S CONTRIBUTION TO THE INDUSTRY

E&Y (Earnst and Young) produced a Global Telecommunication report to help companies gain and apply the necessary risks insight. They identified 10 top risks in telecommunications - 3 of those risks can be partially or totally eliminated thanks to ClickOnSite:

1

**Failure to improve organizational agility**

ClickOnSite allows you to simplify and streamline your structures while driving new forms of interaction.

The solution creates the flexibility to interact with teams, partners and suppliers in new ways.

2

**Lack of data integrity to drive growth and efficiency**

All the datas of your sites, teams, partners, are classified in one single software.

ClickOnSite offers a better network capacity planning, network protection, deployment and maintenance. Extract and find easily the datas that matter.

3

**Lack of performance measurement to drive execution**

ClickOnSite enables you both to drive and also demonstrate measurable progress against their strategic targets.

It involves new internal metrics to track implementation of objectives within the organization.

# BENEFITS

## Boost your productivity

Your teams will complete their projects in record time, by implementing automated processes, with clearly defined responsibilities and tasks. Easily detect and resolve any road-blocks.

## Cut costs due to errors

Financial losses due to inaccurate or incomplete information, or insufficient control, can be significant, when managing thousands of sites spread over a large expanse of territory. Control your costs with ClickOnSite.

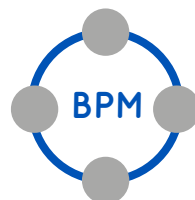

## Increase visibility and control

Do you know how many sites you manage and their state of working order? With ClickOnSite, all your up-to-date information is available on a single platform and visible in real time.

# KEY FEATURES

- ✓ **Site management**  
A powerful tool to store information about existing sites that helps keep an overview on the overall network. It enables site managers to control physical assets and better manage the relationships with owners, tenants and other stakeholders.
- ✓ **Project management**  
A complete, intuitive, user-friendly, cost effective project management tool that helps telecommunication providers or equipment vendors plan, execute and deliver on their multiple projects.
- ✓ **Document management**  
Moving to an electronic document environment offers many benefits: better version control, facilitated collaboration, less emails, reliable backups...
- ✓ **Operation & Maintenance**  
Specifically designed for supervision and field activities, ClickOnSite eliminates most paperwork and organizes records. It integrates trouble ticketing, work orders, preventive maintenance, inventory control, and reporting.
- ✓ **Asset management**  
Improve the overall management of your assets by tracking and tracing your assets on the network. Maximize your ROI and visibility.
- ✓ **Spare parts management**  
Give every person in the maintenance process complete transparency of available stock, allowing accurate planning of maintenance tasks.
- ✓ **Reporting**  
Generate metrics on all aspects of the network lifecycle. The system let you generate reports for any specified data range and can report on a single project, all projects, or any specific network aspect.

# WHY ITD

## We speak your language

We bring you more than 30 years of experience in network deployment. We understand the challenges you face and our number one priority is to facilitate your day-to-day operations.

## We make implementation quick & easy

We know that changing the way you work can be time consuming. Our teams work closely with you to make this a pain-free process.

## More than 10,000 people already use our software products.

Telecom users in 20 countries from around the world are taking advantage of our solutions.

# OUR CUSTOMERS SPEAK FOR US

ITD was born of the simple idea that advanced software, adapted to a specific need, can achieve significant gains in productivity. ITD's software was initially tried out by the Osracom Telecom group, before being adopted by France Telecom on an international scale, and by several other internationally renowned players in telecommunications. The directors of ITD recognized the imperative need to bring the users onboard, by making their everyday jobs easier. Today, ITD attracts and wins over new customers by promoting best practices, a love for the work and a constant will to do better.

1

## 'Helps to focus!'

Good tool that identifies and summarizes required action. Help to focus on tasks and supervise team easily !

Ahmed A, Regional RF & Optimization Manager, Korek Telecom

2

## 'This tool is fundamental'

Every day, we said that the time had come to deploy ClickOnSite in our organisation, because the Excel solution was something prehistoric. Today, I think that it is essential for operators to use tools that consolidate information. The golden age, when operators worked with unlimited resources, is over. Today, we have to optimise our costs and processes. This tool is fundamental.

Patrick G, Ran Deployment Domain Manager, Orange Belgium

3

## 'The training course was perfect!'

The training course was perfect, particularly the description of the whole "rollout" process at the very beginning of the session. I managed to associate numerous ClickOnSite functionalities with technical practices in the field and have a clearer picture of where I could situate myself - as I am not an operational agent who uses the tool on a daily basis.

Ben Zineb, customer support specialist, Orange

4

## 'Everyone in one system!'

It is usefull that everyone works in one system !

Erik D, Owner, Vamea

MAKE THE  
EVERYDAY  
BETTER.
